

30 to 2,500 psi (207 to 17,250 kPa)

Description & Features:

- Two piece construction and designed to withstand even the most severe process applications
- “Continuous use” seals - backing plate will prevent diaphragm from rupturing if pressure sensing instrument fails. Pressure will be held until instrument is replaced
- Diaphragm is separable for servicing and is available with a 1/8” NPT or 1/4” NPT flushing connection for removing any material which may clog the process connection
- Standard diaphragm is constructed of AISI 316L stainless steel and welded to the upper chamber of the seal for pressures 30 psi (200 kPa) and above; optional FKM diaphragm available for ranges from 30” Hg Vacuum (-100 kPa) up to 100 psi (690 kPa). Other diaphragms available
- FKM diaphragm is highly recommended for applications less than 10 psi
- ASME B40.100 compliant
- CRN registered (all 316 SS only)
- 5 year warranty

Applications:

- Where the process fluid is corrosive or viscous and would clog instrument internals/solidify within the pressure gauge, switch or transmitter
