

## **Winters Instruments Introduces: WPS Series Differential Commercial Pressure Switch**

**Toronto, Ontario - Winters WPS Series is a low-pressure differential switch for monitoring and controlling air and non-aggressive gases.**

Designed to handle pressure, vacuum, and differential pressures, the WPS is ideal for HVAC applications and simple to integrate into BAS systems.

The simple-to-use adjustment knob allows for field changes to be made without the use of a reference pressure gauge.

The sensitive silicone diaphragm is able to sense pressure as low as 0.08 inches of water (16 Pa) up to 20 inches of water (4,000 Pa).

The compact size, adjustment knob and competitive cost position, make the WPS Series a perfect low-pressure differential pressure switch for all Commercial applications.

Winters Instruments is a global manufacturer of pressure and temperature instrumentation, with distribution in over 90 countries. Please visit us at [winters.com](http://winters.com) to view our extensive list of products and distributors.
